

Glass-Steagall Now!

28 Apr 2019

Publication Type: Pamphlets

The London and Wall Street-centred world financial bubble is today far larger than in 2008. To avoid a financial collapse and a likely new world war, we must cancel the bubble: split the "too big to fail" megabanks into speculative investment banks (with no government protection), vs. normal banks which invest in the real economy. The CEC's new pamphlet, Glass Steagall Now!, tells you exactly how to do it.
